ACHIEVEMENTS

Implemented Multiple Custom SSO connections for Onelogin

- Created connections between Onelogin and mindtickle, bluevolt, Fleetio

Consistently Within The Top 15% For Ticket Metrics

September 2021 - November 2022

Deployed Multiple Custom Audit Scripts for Vacasa that are still being used today.

- Saved the company upwards of 200,000 dollars per year by removing old accounts and service accounts that were no longer being used.

WORK EXPERIENCE

Vacasa-IT Support Specialist

September 2021 to November 2022

- Provided Technical support to all Vacasa employees
- Managed Account creation, permissions, App assignment and administration
- Assisted in integrating Turnkey Applications to OneLogIn and providing admin accounts for the service desk techs as well as writing documentation for each account integrated

Vacasa-Software engineer II / SaaS Systems Engineer II

April 2023 to June 2024

- Created a plethora of SSO and SCIM connections for various SaaS based applications within both Okta and OneLogIn
- Directly administered over 500 engineering accounts
- Created Custom SCIM connections between various SaaS applications and our SSO platform
- Wrote out documentation for each Custom made SCIM solution as well as offered training sessions to the helpdesk team, Hr, and various managers who operated through the training platforms.
- Created custom Gitops CI/CD pipeline to automate the updating and expansion of the Custom built SCIM connections

SKILLS

Python - 3 years
SQL / RDBMS System - 3 years
IDAP - 3 years
Google Workspace - 3 years
Windows 365 - 3 years
IAM - 3 years
Agile work environments (Jira, Plane) - 3 years
Docker / kubernetes - 3 years
AWS / GCP - 3 years
Virtualization - 3 years
Windows/Linux/MacOS - 3 years
SalesForce - 3 years
Okta / Onelogin - 3 years
Networking - 3 years
SAML / SSO - 3 years
Restful APIs - 3 years
Terraform - 2 years

INTERESTS

Engineering/Computer science
3D modeling
Hardware Architecture
Networking and Cloud infrastructure
Machining and Manufacturing
Automotive/Motorcycle Maintenance and repair
Fauna and Aquatic wildlife

Education

Current Full time student studying Cyber Security Bas at ACC with the intention of transferring to UT and acquiring a masters in Computer Engineering
